OBJECTIVE:

To obtain a challenging position as a Web Developer utilizing my skills and experience in developing, and maintaining web applications.

TECHNICAL SKILLS:

- Proficient in web development technologies such as HTML, CSS, JavaScript, React, Preact, Python, Node.js, Flask, PostgreSQL, MongoDB, and Firebase.
- Experience working with Odoo, WordPress, Magento, Unilog, Nomad, BigCommerce, and Shopify platforms.
- Proficient in utilizing SEO tools such as ScreamingFrog, OptinMonster, Google Search Console, and Google Analytics.

PROFESSIONAL EXPERIENCE:

- **Web Developer** | Journey Better Business Group Inc. | January 2022 - Present
 - **Role: Applications Development Manager (April 2023 - Present)**
 - Set up fresh instances of Odoo and configured virtual hosts.
 - Managed DNS settings and ensured proper domain setup.
 - Developed customized products tailored to clients' needs such as chatbots.
 - **Role: Senior Web Developer (September 2022 - April 2023)**
 - Designed and developed new features for Odoo using Python.
 - Provided alternative solutions for passing and displaying data not natively supported on the platform by utilizing APIs.
 - Managed domain setup, DNS settings, and domain registrations and transfers.
 - Transferred websites from one platform to another (e.g., WordPress to Odoo), including data migration, content mapping, customization, and configuration.
 - **Role: Junior Web Developer (January 2022 - September 2022)**
 - Implemented design mockups on platforms requiring coding (eg. Magento, Unilog, Nomad)
 - Troubleshoot plugins on platforms such as Magento 2 and WordPress.
 - Utilized tools like ScreamingFrog and Sheets for efficient data scraping and manipulation to support client platforms.
 - Improved SEO rankings by fixing and adding product schemas.

PERSONAL PROJECTS:

- **Personal Portfolio** | www.presylord.com | (Tech used: React JS, Tailwind CSS, API)
 - A portfolio website where I can easily highlight my expertise, share details about my background, and proudly showcase the projects I have created.
- **ChatCSV** | chat.presylord.com | (Tech used: Preact, Bootstrap CSS, Flask, API, AWS)
 - An intelligent app powered by OpenAI that analyzes your custom CSV files, providing valuable insights and dynamic conversations based on their data.
- **OCR - Extract Text from Image** | ocr.presylord.com | (Tech used: React JS, Bootstrap CSS, Google Vision)
 - This web app uses Google Vision's OCR technology to effortlessly convert text from images into editable and searchable content, streamlining productivity and data extraction.
